📁 FINAL YEAR PROJECT

Sign Translation Application
Full-Stack Developer and UI/UX Designer
For my final year project, I am contributing as a MERN stack developer to create an innovative platform focused on enhancing communication for the deaf community. Leveraging the MERN (MongoDB, Express.js, React.js, Node.js) technology stack, my role involves building a user-friendly web application that facilitates the learning and expression of signed language. The project aims to bridge communication gaps, empower deaf individuals, and foster inclusivity through interactive and accessible online resources.
